Muhammad Muhammad

Full-Stack Web Developer

Tartus, Syria | muhammad.m.job@gmail.com | +963 995 598 704 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-stack web developer with 3+ years of experience building modern, responsive web applications, and founder of KAREEM Group, which provides software solutions. I work across the whole stack, with React, TypeScript and Tailwind CSS on the front end and Node.js, Express and PostgreSQL on the back end, and take products from design all the way to deployment. I focus on clean code, performance, security and user experience, and I have built multilingual interfaces (Arabic, English and German) with full right-to-left support.

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | KAREEM Group

Jan 2026 – Present

Founded KAREEM Group to provide software solutions, and designed, built and deployed its first two products end to end.

- **Kareem Inventory Management System** — a multi-branch inventory, sales and repairs platform for retail and service shops. It covers serial/IMEI and batch tracking, point-of-sale checkout, purchase orders, inter-branch transfers, treasury, role-based staff permissions, barcode scanning, low-stock and near-expiry alerts, backup and restore, and offline support, in English, Arabic and German with a full right-to-left layout. Live site: kareem-ims.pages.dev
- **Employee Task Management Platform** — a team work platform with a drag-and-drop Kanban board, task comments and activity history, dashboard charts, notifications and live team chat over WebSocket, with Admin, Manager and Employee roles. Live site: employee-task-management-system.pages.dev
- **Security and delivery** — built secure, tested APIs (JWT authentication, password hashing, rate limiting, input validation, automated tests) and deployed both products to the cloud on Cloudflare Pages, Render and Neon PostgreSQL, with protected main branches and required automated checks.

Technologies: React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Material UI, Tailwind CSS, WebSocket, Jest, Vitest

Full-Stack Web Developer | Codex · Remote

Sep 2025 – Dec 2025

Developed end-to-end web applications using modern full-stack technologies. Built responsive front-end interfaces with React.js and Next.js and implemented scalable back-end solutions with Node.js and Express. Designed RESTful APIs, integrated databases, and deployed applications on cloud platforms to deliver performant, maintainable systems across the entire stack.

Technologies: React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, Git, AWS, Docker

React Developer | TechLine Group · Remote

Jan 2025 – May 2025

Developed dynamic, responsive web applications with React.js, collaborating with cross-functional teams to deliver high-performance front-end solutions. Optimized user interfaces, integrated RESTful APIs, and ensured smooth user experiences, following modern practices such as component-based architecture, state management, and reusable code.

Technologies: React.js, TypeScript, Tailwind CSS, ECMAScript, Git, REST APIs

React Developer | Future Learning · Remote

Jul 2024 – Dec 2024

Built dynamic, responsive web applications with React.js for an innovative digital education platform. Developed interactive user interfaces, optimized performance, and collaborated with cross-functional teams to deliver smooth learning experiences, using modern front-end technologies to create scalable solutions that improve user engagement and accessibility.

Technologies: React.js, TypeScript, Bootstrap, Tailwind CSS, REST APIs

Front-End Web Developer | SoftTech · Remote

Dec 2023 – May 2024

Developed modern, responsive web applications with React.js, focusing on performance, accessibility, and smooth user experiences. Worked with cross-functional teams to turn design mockups into functional interfaces with clean, maintainable code, and optimized the front-end architecture and API integrations to deliver scalable solutions aligned with business goals.

Technologies: React.js, TypeScript, Node.js, Vite, CSS, JavaScript, Responsive Design

UX Designer | **Syrian Tech Solutions** · Remote Jul 2023 – Sep 2023

Worked as a UX Designer creating intuitive, user-friendly digital experiences. Collaborated with developers and product teams to design wireframes, prototypes, and high-fidelity interfaces in Figma. Conducted user research and refined designs based on feedback, aligning interfaces with business goals and user needs to improve usability and engagement across web and mobile platforms.

Technologies: UI/UX Design, Figma, CSS

WordPress Developer | **NTT Data Business Solutions** · Remote Oct 2022 – Apr 2023

Developed high-performance WordPress solutions, creating custom themes, plugins, and WooCommerce integrations. Built secure, scalable websites with clean code and a good user experience, and collaborated with teams to deliver business-aligned digital solutions using PHP, JavaScript, and modern development practices.

Technologies: WordPress, JavaScript, UI/UX Design

EDUCATION

Academic Master in Web Science (MWS) Oct 2023 – Nov 2025

Syrian Virtual University, Syria

Bachelor's Degree in Software Engineering 2017 – 2022

Al-Baath University, Syria

SKILLS

Front-End: HTML, CSS, JavaScript (ES6+), TypeScript, React, Next.js, React Router, Vite, Material UI, Tailwind CSS, Bootstrap, responsive and accessible design

Back-End: Node.js, Express, REST APIs, WebSocket, Python, authentication and authorization (JWT, OAuth), role-based access control, MVC and Clean Architecture

Databases: PostgreSQL, Prisma, SQL migrations, IndexedDB (Dexie)

Testing and Quality: Jest, Vitest, React Testing Library, Supertest, ESLint, Prettier

DevOps and Cloud: Git, GitHub, GitHub Actions, Cloudflare Pages, Render, Neon, Docker, AWS

Security: JWT authentication, password hashing (bcrypt), rate limiting, input validation (zod), secure HTTP headers (Helmet, CSP)

Web Platform: Progressive Web Apps and offline support, internationalization (i18n), right-to-left (RTL) layouts, accessibility (WCAG)

UI/UX Design: Figma, wireframing and prototyping, UX principles

Tools and Management: Jira, task prioritization, deadline management, cross-functional collaboration

LANGUAGES

Arabic (Native) | **English** (IELTS 6.5)
